

Emergency Ferret Veterinary Services Requested

Over 700 rescued ferrets will be in need of ferret veterinary services within the next few months

Lori Sies, the owner of Ferret's Dream House Shelter (Lori Sies, Ferret's Dream House Shelter, 845 Tulip Drive, Lynx OH 45650), has been dealing with a situation of unprecedented magnitude. A local breeder was forced to close down and surrender over 700 ferrets to Lori's shelter. You may learn more about this surrender at: <http://kesrael.tripod.com/> and www.ferret.org

As these ferrets are being placed in ferret shelters around the country prior to going to forever homes, Lori and the ferret community are desperate for donated (or discounted) help from vets and vet schools. Many ferret vets have already volunteered their services in New York, New Jersey, Florida, Louisiana and Texas. We are asking if you or your colleagues would be willing to donate (or discount) expertise, spay/neuter services, and vaccinations to help with the overwhelming challenge that this ferret shelter is dealing with. Since the ferrets came from a breeder, none of them have been spayed or neutered; some are even pregnant.

If you or your colleagues are able to help, please contact the chair of our group, Renee Downs at crdowns@gmail.com.

Please provide the following information:

- What is your regular charge for spay/neuter?
- What price will you charge for the spay/neuter?
- How many at this price?
- Will you provide them at n/c?
- How many at this price?
- Will you provide rabies, distemper or both vaccines?
- How much for the vax?
- How many at this price?
- Will you accept Humane Society Spay/Neuter vouchers?
- Contact info: (Any special instructions when calling your office?)

Thank you for your time and consideration.
